

ELEMENT

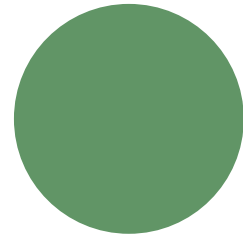

ELEMENT

ELEMENT

RETURN TO THE ORIGIN

ELEMENT is inspired by the origin of light and the essence of nature to present a system based on replaceable and recyclable components. A comprehensive vision of circular economy where sustainability and innovation converge in a visual language where light regains its protagonism in space.

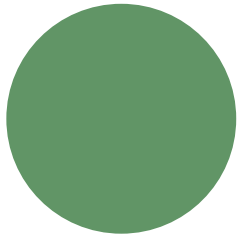

FUTURE IS CIRCULAR

Reduce, reuse, recycle, and reclaim to reimagine the future. The ELEMENT formula is inspired by the philosophy of the 4Rs, an R&D and sustainability approach that extends the equipment life and reduces its ecological footprint.

- INTERCHANGEABLE LED LIGHT SOURCES
- REUSABLE LUMINAIRES
- REPAIRABLE POWER SUPPLIES
- EQUIPMENT RECONDITIONING AT THE FACTORY

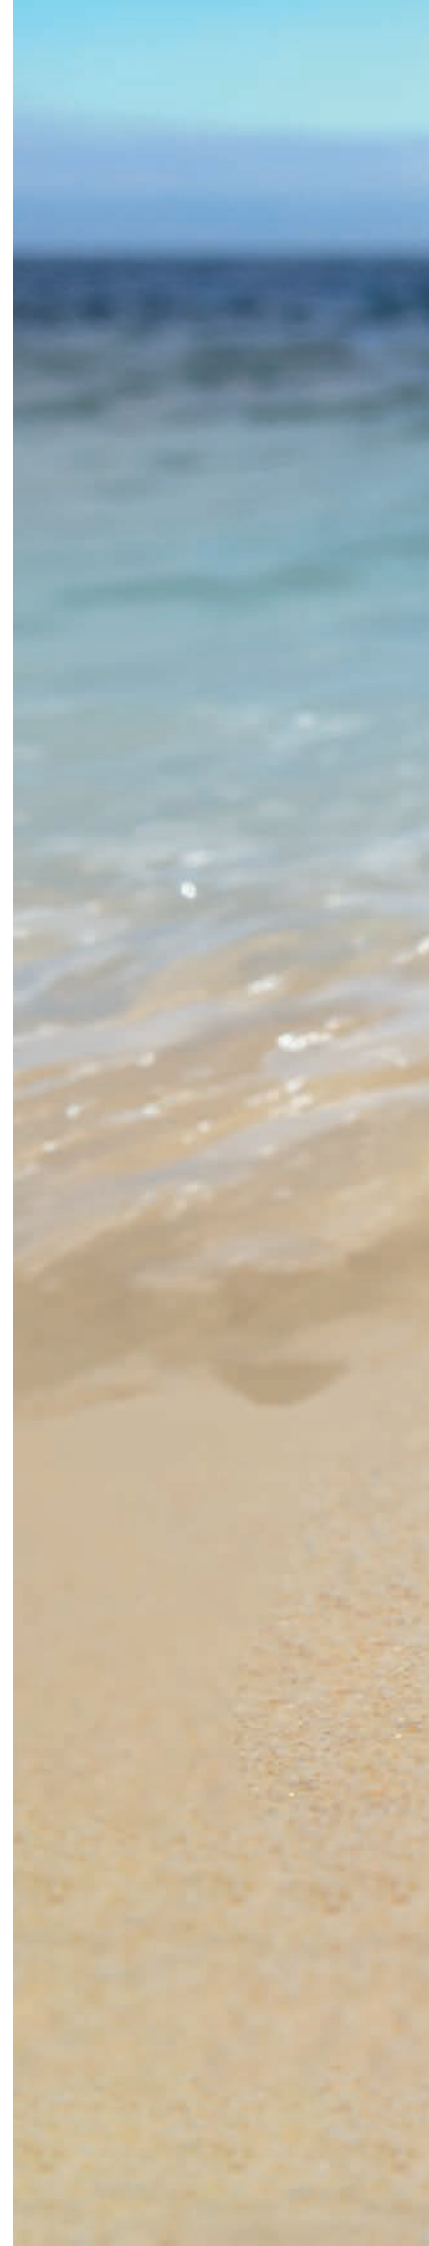

WITH E OF EVOLUTION

8

The high-efficiency technologies and sustainable materials fusion turns ELEMENT into a pioneering system that evolves towards a new way of understanding the relationship between lighting and the planet.

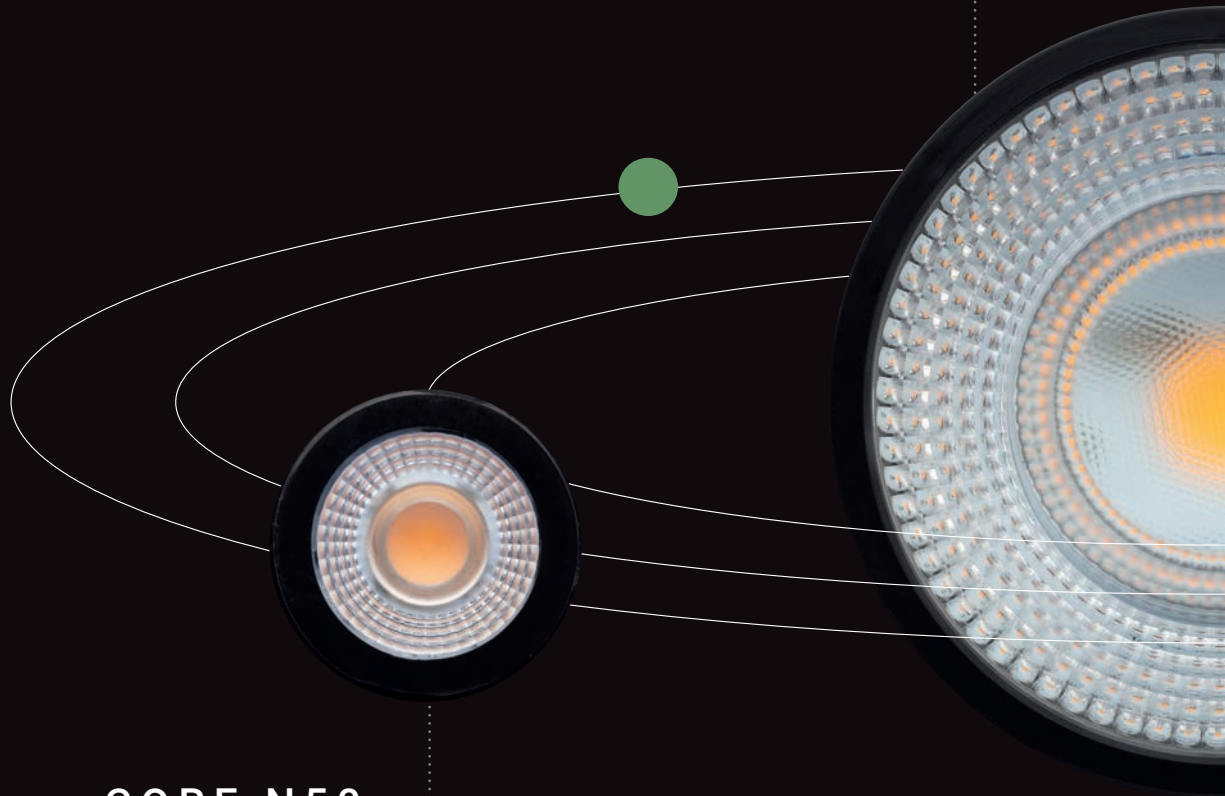

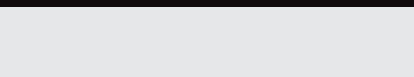

A JOURNEY TO THE HEART OF LIGHT

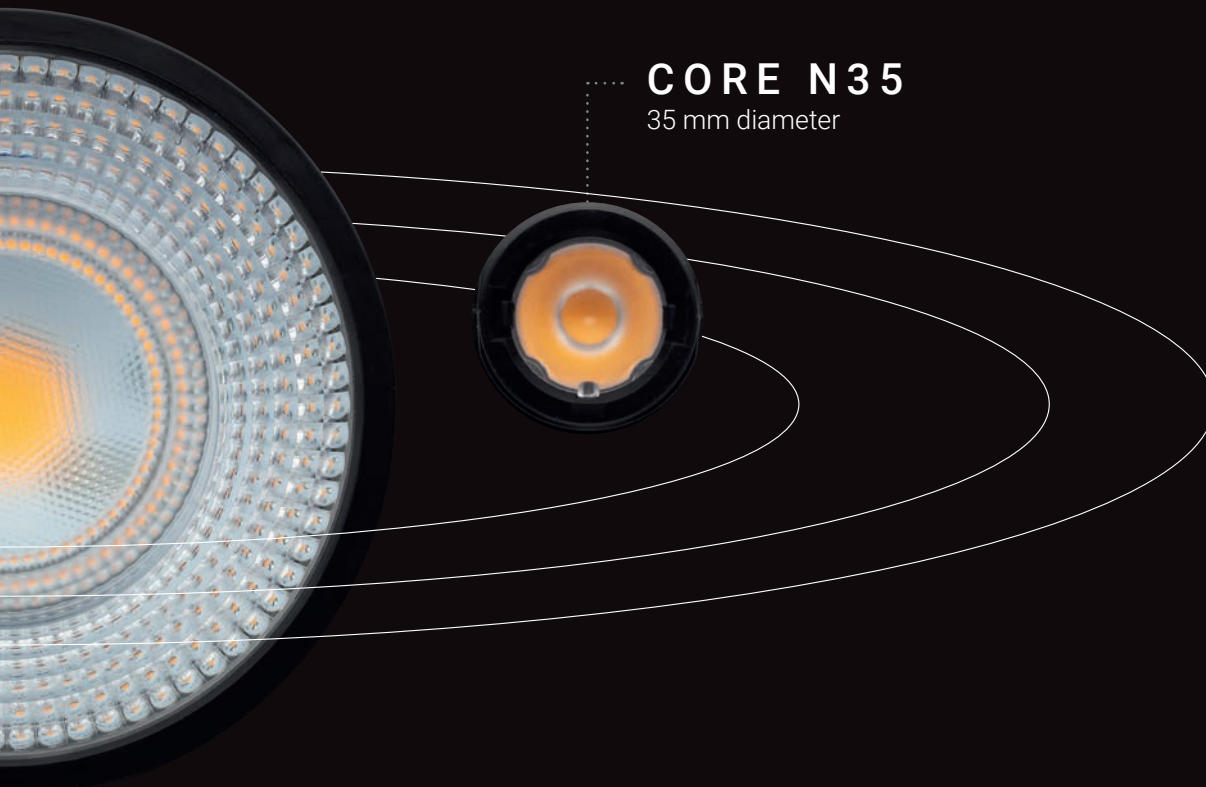

CORE N110
110 mm diameter

10

CORE N50
50 mm diameter

CORE N35

35 mm diameter

The technological and ecological potential of ELEMENT is concentrated in the Core. A single interchangeable light source for all luminaires in the space, available in three sizes and with multiple configurations.

THE METAMORPHOSIS OF SPACE

12

ELEMENT looks back at the surroundings to find the balance between environment and design. A limitless visual language inspired by nature that connects interior and exterior spaces through light.

ELEMENT

ILLUMINATING WELLBEING

Humans spend 90% of their time in indoor spaces illuminated by artificial light, therefore ELEMENT focuses its technology on people to take care of their physical and emotional wellbeing in daily life.

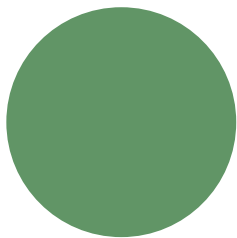

ELEMENT

FROM CORE TO BEYOND

Core light source allows to create sustainable and customized lighting ecosystems by combining it with the ELEMENT system's luminaires, with an infinite development potential.

SIMPLICITY AND ECODESIGN

Normagrup's Plug & Light system allows Core LED light sources to be quickly and easily replaced. A formula that simplifies space composition through a visual language where lighting and design complement each other. The fusion of technology and aesthetics, combining mastery of light with a family of luminaires available in a range of colours inspired by nature.

COLOURS

Spatial colours Cool tones

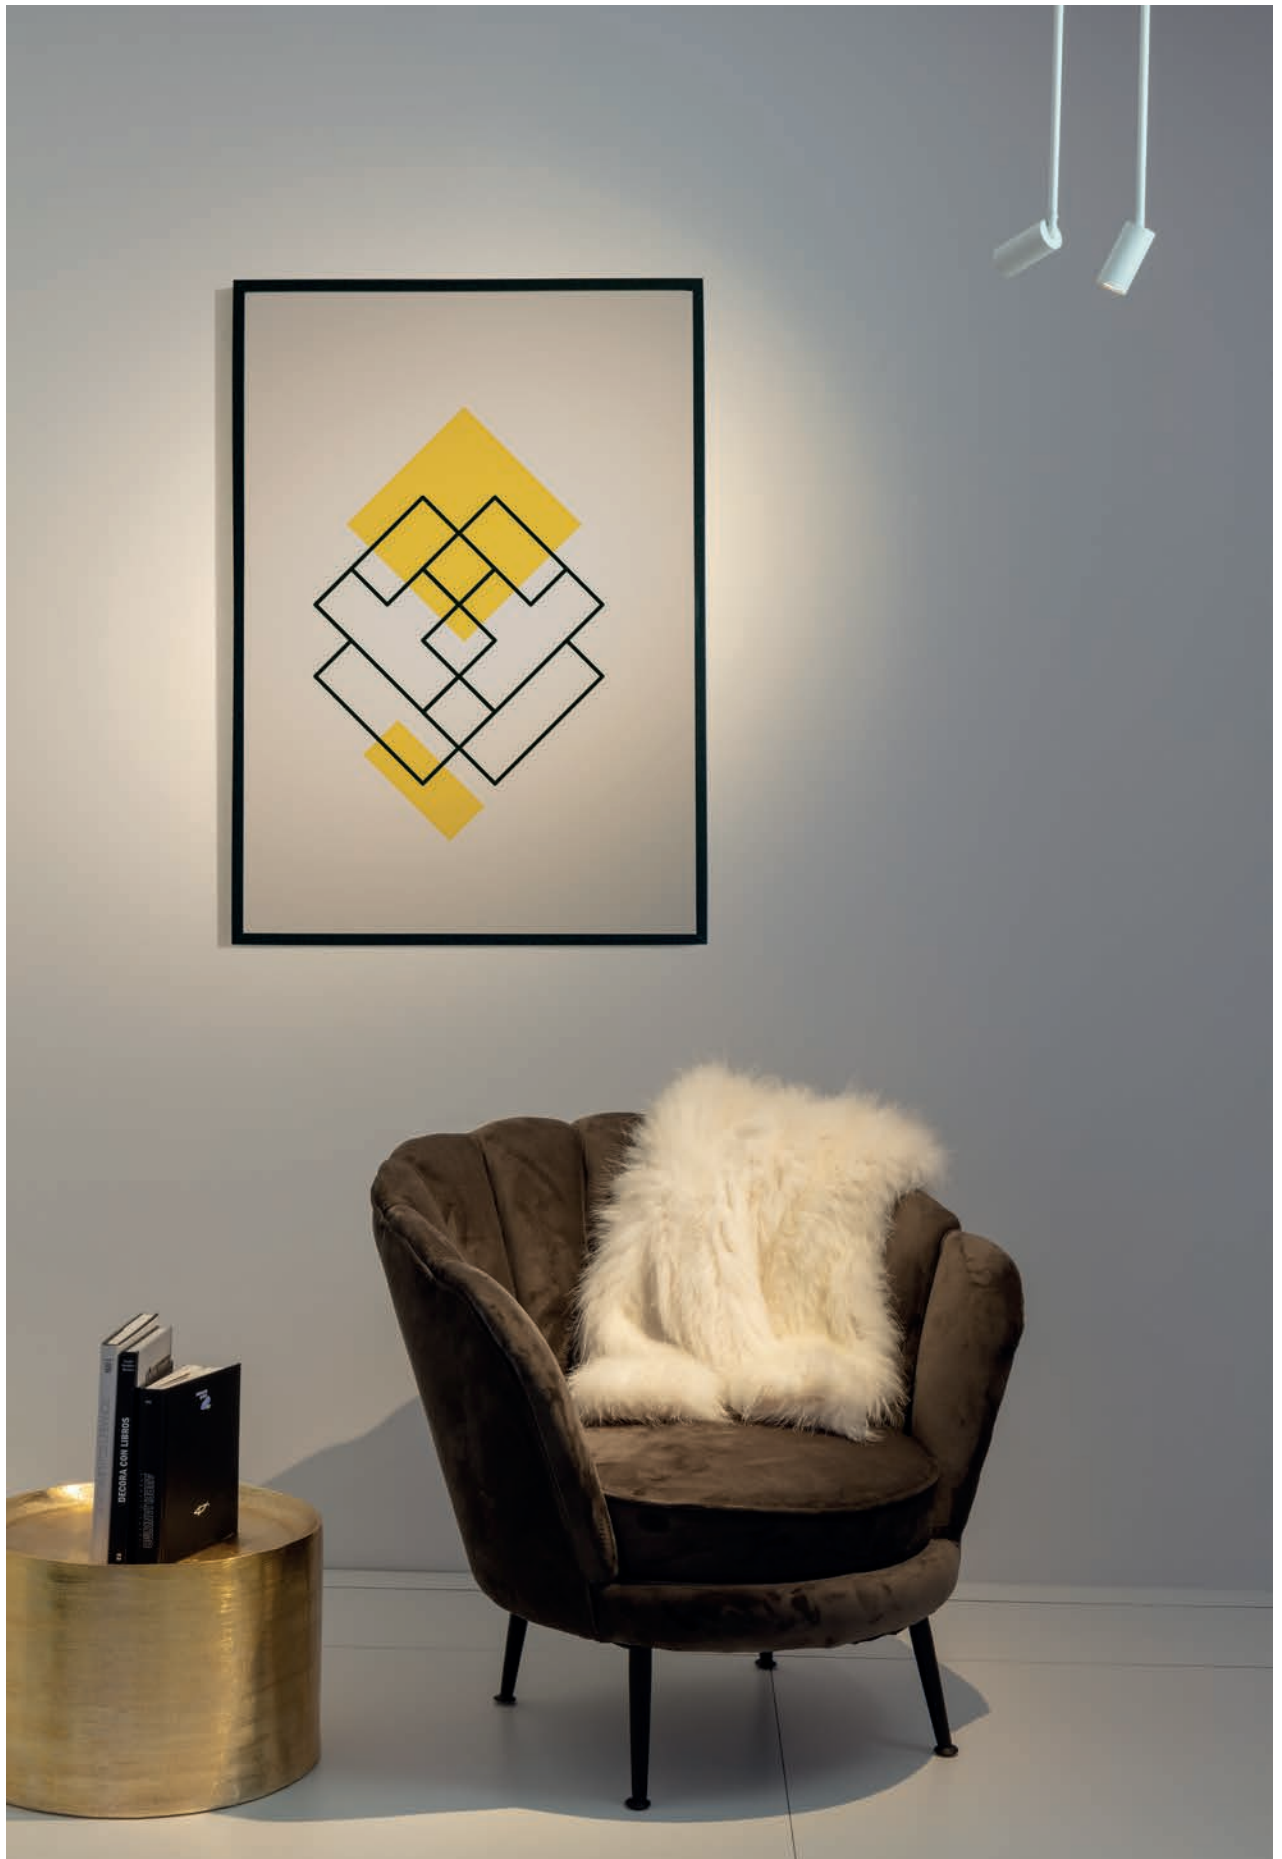

-  Astral White
-  Black Galaxy
-  Moon Grey

Natural colours Warm tones

-  Red Maple
-  Golden Poplar
-  Brown Oak

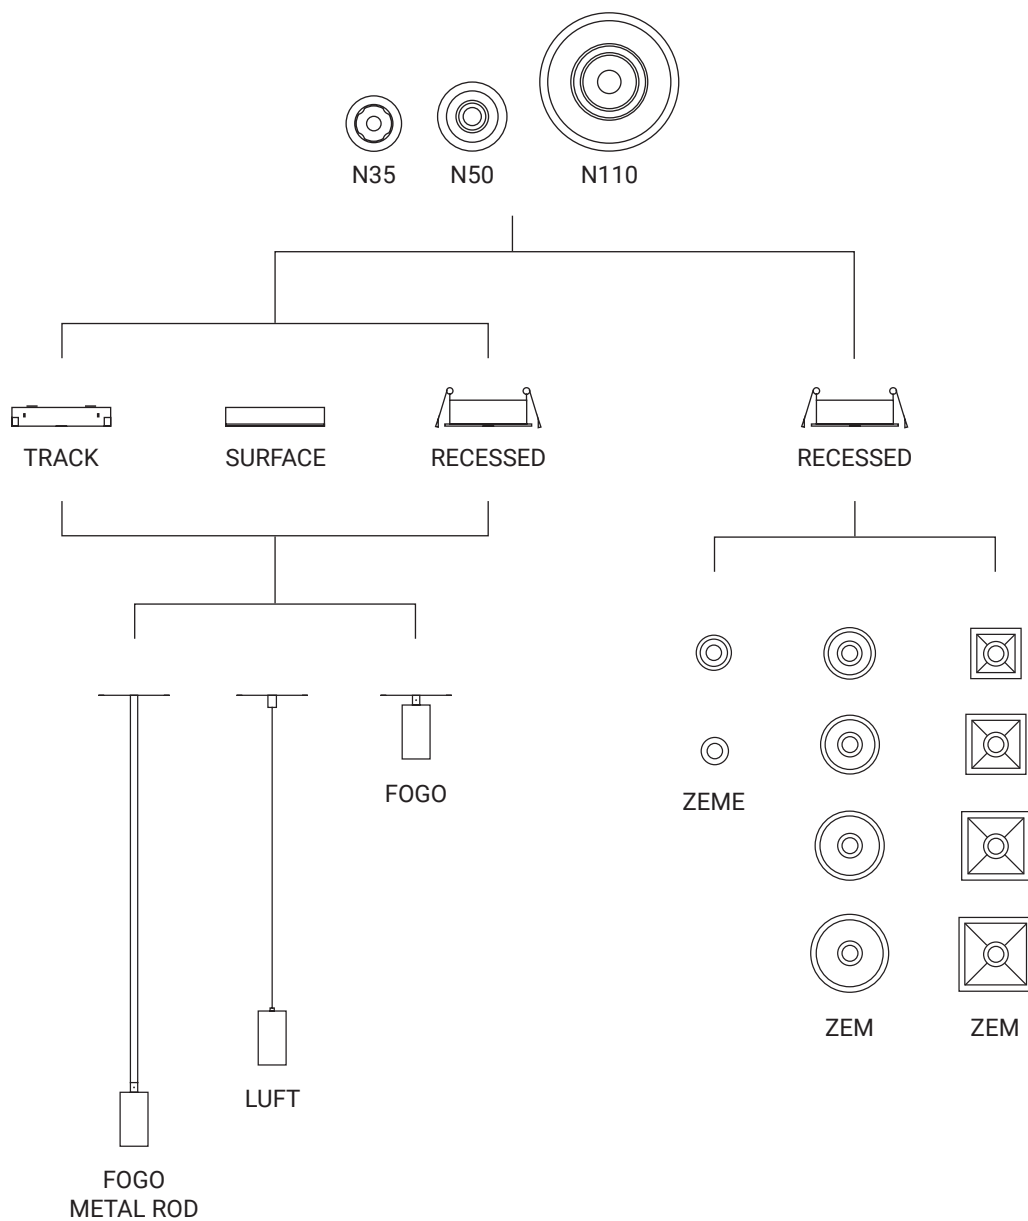

THE ELEMENT SYSTEM

A customized composition of the space with multiple lighting configurations, designs and installation options.

THE SENSE OF TECHNOLOGY

Since 1971, Normagrup has been developing its own lighting technologies with a vision that merges care for people, the study of the interaction of light with the environment, and the creation of innovative architectural spaces. A comprehensive engineering, design, and research concept that allows the company to manufacture unique products at its facilities in Asturias, where quality, a human-centered approach, and sustainability give meaning to technology every day.
